

## Automated Messaging System (AMS)

### Can you use it ?

Of course! Here's a list of our target markets:

- Medical Offices
- Hair Salons
- Automotive Repair
- Real Estate
- Financial Services

Anyone who needs to remind a customer of anything can use our system !

### ABOUT OUR NETWORK

Our national network spans four datacenters, located within the continental USA. Each server is redundantly available to you, on the basis of network availability, power and backup services.

### DATA SECURITY

SSL Certificates ensure that your data is not passed "in the clear" to our servers, guaranteeing that your customers' data will remain private – as it should be!

We've developed an Automated Messaging System that will not only impress your customers; it will put your competitors on notice as well!

Your competition will struggle to keep up with your level of customer service after using our AMS system after just one week!

Do you run a busy office, and pay people to sit behind a desk making phone calls to remind your busy customers that they have an appointment at some point in the future? We can help that employee become more efficient, while at the same time moving your office environment along faster.

- Increase the efficiency of your office personnel, easily and effectively.
- Your calls go out with the Caller-ID of your office, giving your customers peace of mind.
- Easily navigated web based interface
- HIPAA Compliant – our servers keep your data private. We also offer an in-office system offering should you wish to keep your data in your office.
- Our Voice Over IP (VOIP) network allows us to operate with a low cost basis, passing that on to you!

Our customers have experienced a turn around in their patient and customer communications, from reminding them of normal appointments, to scheduling conflict resolution and cancellations. All of this results in less no-show appointments, better informed customers, and more time dedicated to face time with your customers by your employees instead of phone time.

Call us today, by dialing (800) 903-6772, and find out how you can be on the road to better communication. Most accounts can be set up within the same business day !

**Eliminate  
No-Shows!**

**Increase  
Efficiency!**

**Automate  
your reminders!**

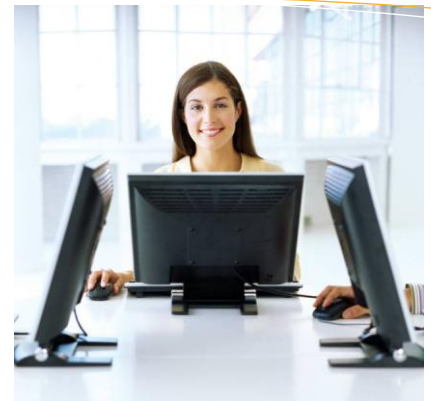

When you gently remind your customers of their appointments, your no-shows and expenses are decreased.

AMS helps YOU do your job, easily and inexpensively!
